

# Starting the server

Understand how Angular's development server helps us with developing an application.

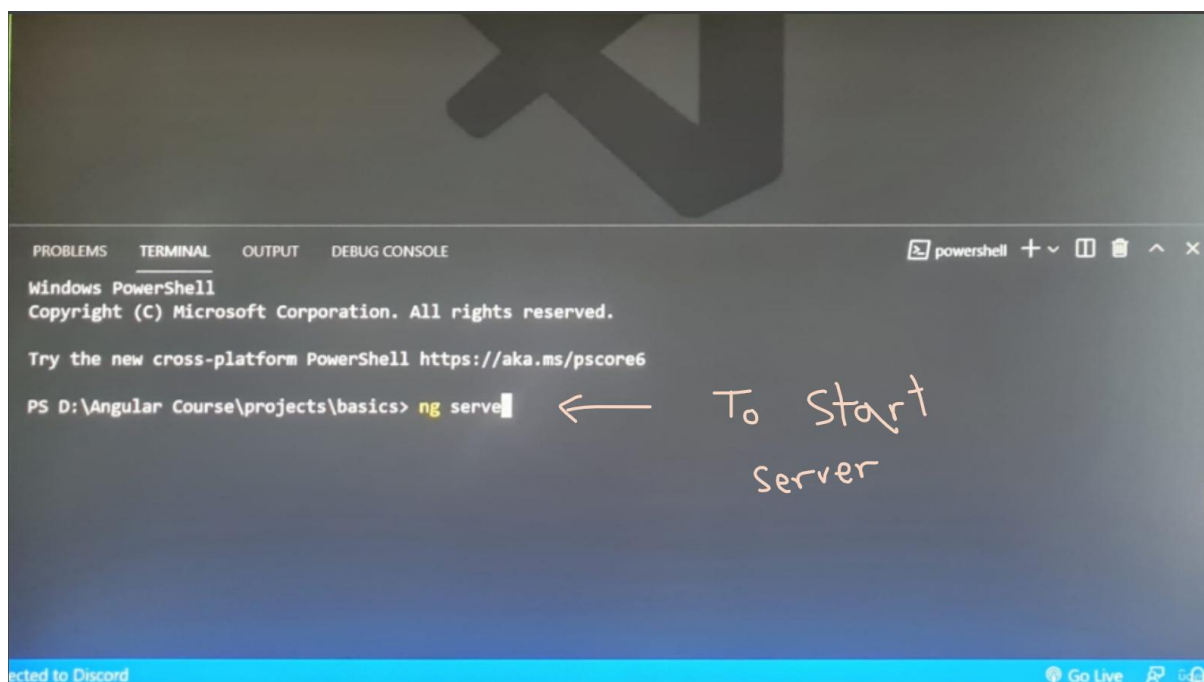

Udemy

## Development Server

- Required for HTTP Requests
- Angular comes with a server
- Monitors files for changes
- Not suitable for production

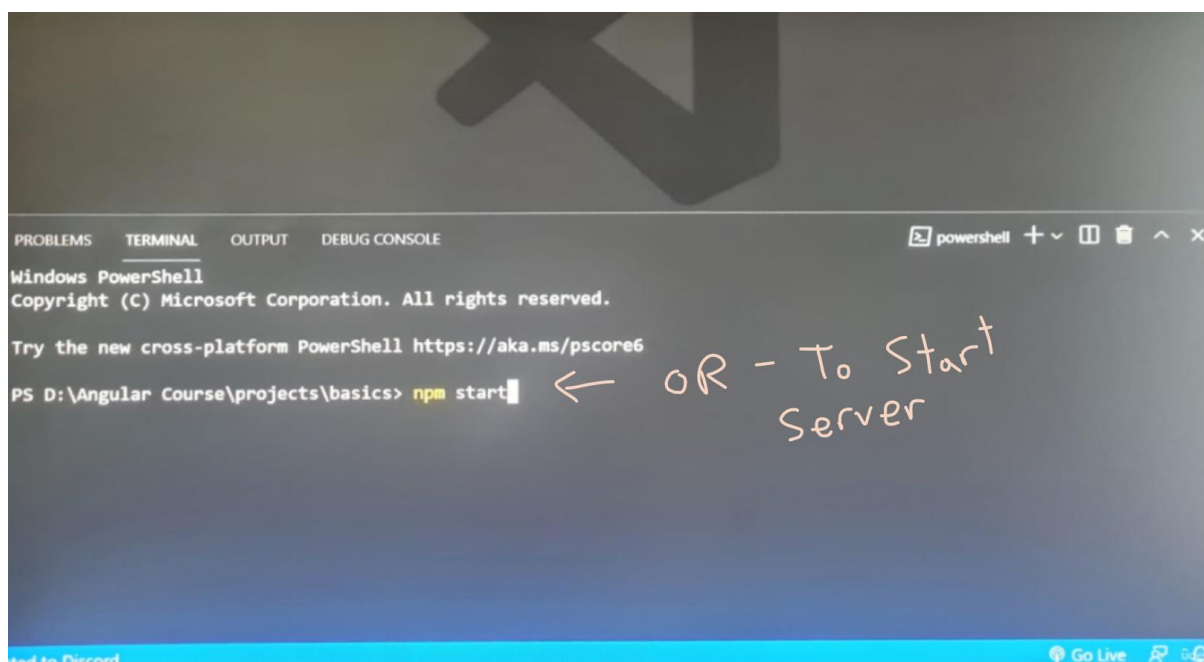

PROBLEMS TERMINAL OUTPUT DEBUG CONSOLE powershell + - [ ] [ ] ^ X

Windows PowerShell  
Copyright (C) Microsoft Corporation. All rights reserved.

Try the new cross-platform PowerShell <https://aka.ms/pscore6>

PS D:\Angular Course\projects\basics> ng serve ← To Start Server
